Concrete Additive Water Reducer Super Plasticizer Melamine Superplasticizer

1. Concrete Additive Water Reducer Super Plasticizer Melamine Superplasticizer is a kind of free-flowing powder form superplasticizer, as a universal product, designed for applications of flowing mortars with universal and special cementitious binders.

2.Composed of polycarboxylate ether copolymer, its main chain anchors on the surface of cementitious binder particle while the unique comb structure as side chain stretches in the water.

3.The combination of electrostatic force and steric stretching effect imparts low water demand and high flowing ability to mortars.

Scope of application:

Concrete Additive Water Reducer Super Plasticizer Melamine Superplasticizer Suitable for compounding long-distance transportation.

Suitable for compounding normal concrete

Suitable for compounding high durable concrete.

Mobile/Wechat:0086 13053363281,0086 17865273019
Mail:sales@zhuoxingchem.com,sales02@zhuoxingchem.com
Web site:https://www.sdzhuoxingpce.com,www.zhuoxingchem.com

Suitable for compounding high-performance and high flowing concrete.

Suitable for compounding SCC concrete.

Advantages

Concrete Additive Water Reducer Super Plasticizer Melamine

Superplasticizer will make the less slump loss of concrete.

Our PCE will bring higher compressive strength of concrete .

Our PCE can make workability of concrete best .

Our PCE can make longer retention time of concrete.

Our PCE can make lower shrinkage of concrete.

Suitable for compounding long-distance transportation.

Suitable for compounding normal concrete

Suitable for compounding high durable concrete.

Suitable for compounding high-performance and high flowing concrete.

Suitable for compounding SCC concrete.

technical

1.We provide on-line technical support at any time. If necessary, on-site guidance is available.

2.Reward regular clients in surprising ways.
